

Client: Murphy Pipelines

Subcontractor : Twig Trading Ltd

Subcontract Works: Re-Seeding of Pipeline Easement

Date of Works : September 2009

TESTIMONIAL.

Following completion of the installation of the pipeline and replacement of the topsoil, fences and hedge lines by Murphy Pipelines Ltd, Twig Trading Ltd were appointed as the sole subcontractor responsible for the final preparation of soil and restoration of the permanent pasture and stewardship grassland.

Twig Trading Ltd carried out their works professionally and impressed with the quality of equipment, workmanship and their ability to work and cooperate with landowners, ourselves and our Client in the programming of their works in an efficient manner.

Twig Trading provided a good standard of Health, Safety and Environmental documentation together with appropriate certification and personal protective equipment for the tasks carried out.

The personnel employed were trained and qualified to operate the equipment and carry out the works and were able to function within the constraints of the sequencing dictated by the various parties.

The works were completed to a high standard and we would have no hesitation in inviting Twig Trading Ltd to tender for future work of this nature as they have proved to be an agricultural contractor prepared to meet key dates and deadlines.
